*Music control
Play/pause
Previous/next*

Tap Video Control icon to activate video control application

*Video Control
Play/pause
Previous/next
Fast forward /Rewind*

2. Incoming Call & SMS

To connect the phone to send SMS TMWatch, the watch will display the message. (This feature is recommended before the test if it can demonstrate) or through the following steps to view the newsletter:

TMWatch: Home→ Notification

SMS font zoom in or out, as follows:

TMWatch: Home→ Notification

Into a one newsletter, long fingers, hold down the TMWatch screen, after a while it pops up a bar, you can slide left and right to adjust the font size of the newsletter.

Calling the phone connected with TMWatch, TMWatch call is displayed on the window, this window on the "reject" and "Mute" buttons.

3. Anti-lost

When the phone watch some distance away (Bluetooth can control the distance), the watch will be issued a cell phone lost alarm.

This feature can be manually disconnect the phone and watch the connection to demonstrate:

All Applications → TMWatch

Applications → menu → disconnect a device

And then manually connect the watch and mobile phone:

All Applications → TMWatch

Applications → menu → connect a device

As follows:

TMWatch: Home → Guest Mode

Guest Mode by clicking on the icon to open and close the Guest Mode function. When the Guest Mode opens the phone is limited on some of the features will not be used, for example, SMS cannot be viewed or cannot remove the application. When the Guest Mode is turned off the restore function to those prohibited use.

5. Keyless

As follows:

TMWatch: Home → keyless

By clicking on the icon to open and close the keyless keyless function. When the keyless opened the phone wakes up from hibernation or does not require a password can unlock the phone directly. When the keyless turned off the phone to wake from sleep or when you must enter the password to unlock the phone.

Notes and unexpected circumstances

1. Before the presentation please turn off the phone WIFI, when the phone WIFI open, TMWatch and mobile phone easily disconnected.

As follows:

Phone: menu → settings → Wireless & networks → Wi-Fi

2. If TMWatch and phone suddenly disconnected or TMWatch cannot control your phone, by following two steps to resolve:
 - a: first manually disconnect TMWatch connected to the phone, then cancel TMWatch paired with the phone, re-pairing and connection. At this point TMWatch of BT Discoverable has been closed, be reopened in order to be mobile phones to scan, and because the phone is connected on each TMWatch and after, TMWatch the BT Discoverable will be automatically closed.

b: steps do not solve the problem in a case, disconnect and cancel the pairing in the need to enter the phone after the application management TMWatch clear the data and forced to stop the program and then restart the phone and TMWatch, and then re-pair and connection. Clear data and forced to stop as follows:

Phone: menu → settings →

Applications→ Manage applications→
TMWatch

Click Clear data→ OK, then click Force
stop, and finally restart the phone.

FCC statement

This device complies with part 15 of the FCC rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) This device must accept any interference received, including interference that may cause undesired operation.

NOTE: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation.

This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation.

If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:
Reorient or relocate the receiving antenna.
Increase the separation between the equipment and receiver.

Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.

Consult the dealer or an experienced

radio/TV technician for help.

Important: Changes or modifications not expressly approved by the part responsible for compliance could void the user's authority to operate the equipment.
